

## ITELCOND MODULAR STORAGE

A new energy storage concept with working voltages up to 980V and the highest specific capacitance Vs volume ratio.

The **Itelcond Modular Storage** is easy and quick to install, only few simple operations to position it into the industrial racks.

Vnom. max	350V	400V	450V	500V	680V	780V	880V	980V	Size cm.
Cmax	240mF	170mF	140mF	100mF	60mF	42,5mF	35mF	25mF	142x265x760
Iripple@55°C	600A	500A	450A	360A	300A	250A	225A	180A	
Connections	Positive Negative	Positive Negative	Positive Negative	Positive Negative	Positive Central Negative	Positive Central Negative	Positive Central Negative	Positive Central Negative	

- Instant energy availability
- Bleeder resistor included
- Fully insulated INOX chassis
- Unbalance alert
- Fully customizable sizes and capacitance
- Simple connections
