

New MIAA IGBT modules

Commonly used trusted module with baseplate width of 62 mm. The module is based on the 6th generation of IGBT chips from Fuji. Several circuit configurations are available: half-bridge, high-side chopper and low-side chopper. Nominal voltage 1200/1700 V, current from 250 to 600A.

Extended current range

Storage temperature down to -55°C

Solderable control terminals
